RETURN RECEIPT REQUESTED

Mr. Conrad Simon, Director
Air and Waste Management Division
U. S. Environmental Protection Agency
Region II
36 Federal Plaza
New York, New York 10270

Dear Mr. Simon:

Re: Your letter of September 13, 1983 - Request for Information

Your letter requested a copy of our closure and post-closure plan for Eli Lilly Industries, Inc., ID No. 090009457. The preparation of these plans are required of those facilities subject to interim status standards, CFR 40, Part 265.

This particular Eli Lilly facility is not subject to interim status standards and therefore is not required to maintain a closure and/or post-closure plan. The status of this facility has been the subject of several pieces of correspondence beginning with my letter of December 18, 1981 addressed to U. S. EPA Permits Branch, Room 432, whereby I requested an updating of the facility to small quantity generator only. As late as February 15, 1983, Mr. A. Ullrich of our Corporate office in Indianapolis in a letter addressed to Mr. R. A. Baker, summarized all correspondence referencing the facility status change. This summary included a reference to a letter of January 10, 1982, by Mr. John Jiménez, an Environmental Scientist in your Regional headquarters in which he acknowledged that this facility appeared not to be subject to Part 264 and 265. In Mr. Ullrich's last letter of February 15, 1983, he had again requested that the status records in Region II pertaining to this facility be updated to reflect current status. May I once again repeat his request.

Region II
26 Federal Plaza
New York, New York 10278

Dear Mr. Simon:

Re: Your Letter of March 1, 1984 -
Request for Information - PRD090009457

This letter requested a copy of our closure and post closure plans for Eli Lilly Industries, Inc. (PRD090009457). As we understand the preparation of these plans are not required because we are a generator of less than 1,000 kgs/month and we do not store hazardous wastes for more than ninety (90) days. They are sent to our Mayaguez, P. R. plant which has a TSD facility with ID No. PRD091024786.

We recieved a letter asking for the same information on September 13, 1983 and it was answered on October 14, 1983, at that time reference was made to several pieces of information related to our request for a change of status from a TSD to a small quantity generator. Copies of the reference communications are attached as follows:

1. Letter asking for declassification, December 18, 1981.
2. Mr. John Jimenez' (EPA) answer to the above letter, January 20, 1982.
3. Mr. Arlie Ullrich's response to Mr. J. Jimenez' letter, February 11, 1982.

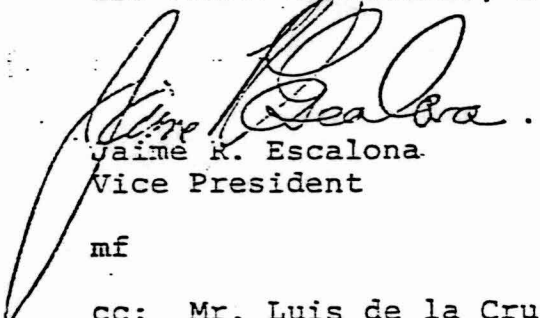

Mr. Conrad Simon
US EPA
March 19, 1984
Page 2

4. Letter sent to Mr. Richard A. Baker summarizing previous communications and asking for a change in status in EPA records, February 15, 1983. .
5. Answer to your letter received on September 13, 1983, October 14, 1983.

If additional information is needed, please let us know.

Yours very truly,

ELI LILLY INDUSTRIES, INC.

Jaime R. Escalona
Vice President
